UPDATE: COVID-19 VACCINE & PAIN MANAGEMENT INJECTIONS - MAYFAIR DIAGNOSTICS

Mayfair has updated our guidance for cortisone injections and the COVID-19 vaccine while maintaining our increased health and safety precautions. Mayfair's latest recommendations are based on the potential suppression of the immune system following steroid use.

Effective immediately, patients who have a scheduled date for their COVID-19 vaccination, will have their pain management injections booked either two weeks before their first or second vaccination or one week after their first or second vaccination.

Mayfair's Contact Centre will schedule your patients according to the above guidelines.

For any further questions, please contact Business Development at bd@radiology.ca. Please visit www.radiology.ca for updated information from Mayfair.
