

**CONTACT US**

Please contact us if you have questions, need more information about our services, or want to book an appointment.

**Toll Free** 1.866.611.2665

**Tel** 403.777.3000

**Fax** 403.777.3001

You can book your appointment in over 200 languages. Simply call us and ask for your preferred language.

# OUR IMAGING SERVICES

Providing clarity for your health

AT MAYFAIR DIAGNOSTICS,  
OUR VISION IS TO HELP  
CREATE A WORLD IN WHICH  
EVERY PERSON HAS CLARITY  
ABOUT THEIR HEALTH.

**O**ur compassionate and specialized team leads the way in providing comprehensive screening, diagnostic, and interventional medical imaging services across 14 locations in Alberta and two in Saskatchewan.

Owned and operated by over 60 radiologists, each year our expert team uses state-of-the-art technology to serve more than 700,000 patients and interpret images from over 90,000 patients in rural and remote locations.

## SERVICES COVERED BY YOUR PROVINCIAL HEALTH CARE PLAN

### **BONE MINERAL DENSITOMETRY**

We use a low-dose X-ray scan to measure bone density to help determine if you have osteoporosis or are at risk of bone fractures.

### **BREAST IMAGING**

Our comprehensive breast wellness services lead the way in Alberta and include automated breast ultrasound, biopsy, breast MRI, and mammography, which are used to examine the internal structure of breast tissue for early detection of cancer.

### **CARDIAC IMAGING**

We assess your heart health by examining the structure and function of the heart, heart valves, and arteries using echocardiogram, exercise stress testing, and myocardial perfusion imaging.

# SERVICES COVERED BY YOUR PROVINCIAL HEALTH CARE PLAN

## NUCLEAR MEDICINE IMAGING

We use radioactive material and a gamma camera to assess the function of organs, such as the heart, thyroid, kidney, and bones, to detect disease.

## PAIN MANAGEMENT

We use ultrasound or X-ray guidance to inject medication through a small needle and target areas of concern for chronic pain, arthritis, or ligament and soft tissue injuries. These therapies include cortisone, hyaluronic acid, tenotomy (dry needling) with or without platelet-rich plasma, and nSTRIDE autologous protein solution injections.

## ULTRASOUND

We use high frequency sound waves to examine organs, tissues, and blood vessels for abnormalities. These include both general and specialized exams, including breast, musculoskeletal (joints and muscles), obstetrical, and vascular ultrasounds.

## X-RAY

The most frequently used form of medical imaging, where a small amount of radiation is passed through the body to create an image. All our X-ray services are offered on a walk-in basis.

## TELERADIOLOGY

We offer around the clock interpretation of images and reporting for health regions, hospitals, and clinics in rural and remote locations.

## IN-HOSPITAL

Our radiologists perform exams in three Calgary hospitals (Peter Lougheed Centre, Rockyview General, and South Health Campus) and most Alberta Health Services-owned ambulatory care centres.

## PRIVATE PAY SERVICES

### COMPUTED TOMOGRAPHY (CT)

We use a combination of X-rays and computer technology to produce comprehensive and detailed images of any part of your body – much more detailed than traditional X-rays. This helps pinpoint areas of concern and detect diseases while they can still be successfully treated.

At Mayfair Diagnostics our CT scans can be diagnostic or screening:

- **Diagnostic CT imaging** – helps locate abnormalities after you have developed a symptom or your health care practitioner has discovered a problem.
- **Preventative CT screening**– can help with early detection of diseases before they become clinically apparent.

Our CT scans are offered as private pay exams. The cost for diagnostic CT imaging can depend on the body part being scanned and whether or not contrast solution is required. For preventative CT screening we offer individual exams or Health Assessment Packages that provide a discount on multiple imaging exams when purchased together.

## PRIVATE PAY SERVICES

### **MAGNETIC RESONANCE IMAGING (MRI)**

We use this advanced imaging technique that uses radio waves and a strong magnetic field to provide very clear images of your body and diagnose subtle abnormalities.

Mayfair operates both 1.5T and 3T MRI services at Mayfair Place. Having two magnet strengths provides greater options to use MRI to more specifically meet the imaging needs of various medical conditions.

*In Alberta, MRIs are offered as a private pay service.*

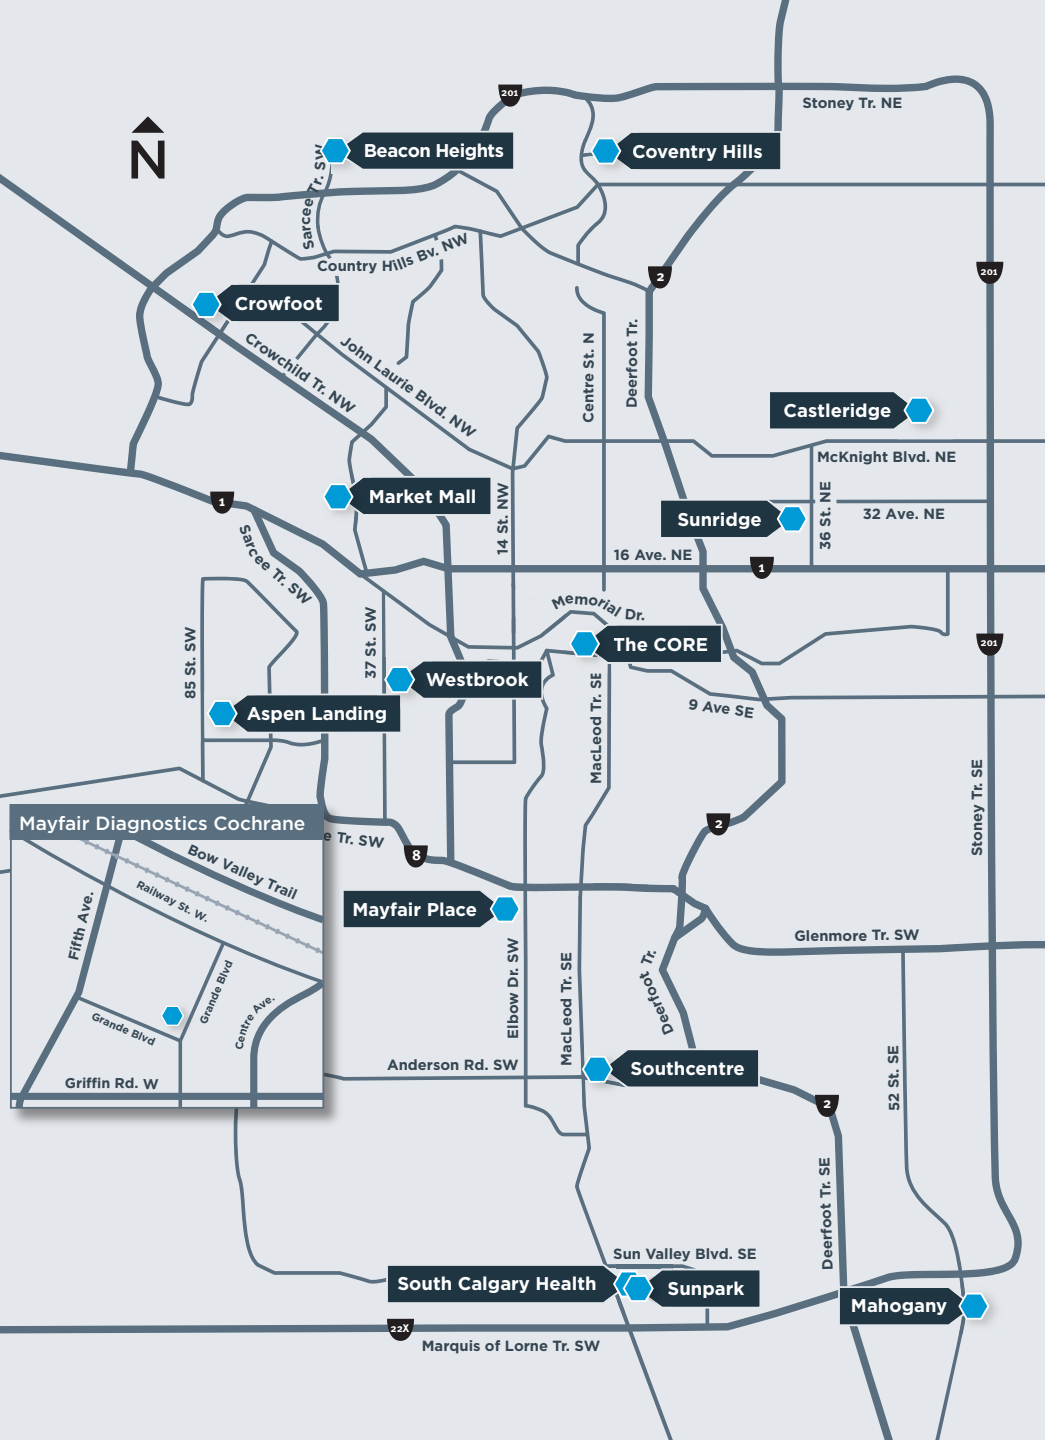

### **PAIN MANAGEMENT**

Some of our pain therapy services include a cost for the medication only (hyaluronic acid) or a cost for the entire treatment (platelet-rich plasma, nSTRIDE autologous protein solution injections).

## CALGARY CLINICS

### Aspen Landing

105, 339 Aspen Glen Lndg. SW  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
X-ray

### Beacon Heights Shopping Centre

440, 12024 Sarcree Trl. NW  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
X-ray

### Castleridge Plaza

20, 55 Castleridge Blvd. NE  
Bone Mineral Densitometry,  
Breast Imaging, Nuclear  
Medicine Imaging, Pain  
Management, Ultrasound,  
X-ray

### Coventry Hills Centre

457, 130 Country Village  
Rd. NE  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
X-ray

### Crowfoot Business Centre

401, 400 Crowfoot Cres. NW  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
X-ray

### Mahogany Village Market

230, 3 Mahogany Row SE  
Bone Mineral Densitometry,  
Breast Imaging, Nuclear  
Medicine Imaging, Pain  
Management, Ultrasound,  
X-ray

### Market Mall Prof. Building

333, 4935 – 40 Ave. NW  
Bone Mineral Densitometry,  
Breast Imaging, Nuclear  
Medicine Imaging, Pain  
Management, Ultrasound,  
X-ray

### Mayfair Place

132, 6707 Elbow Dr. SW  
Bone Mineral Densitometry,  
Breast Imaging, Cardiac  
Imaging, Computed  
Tomography (CT),  
Magnetic Resonance  
Imaging (MRI), Nuclear  
Medicine Imaging, Pain  
Management, Ultrasound,  
X-ray

### South Calgary Health Centre

105, 31 Sunpark Plz. SE  
X-ray only

### Southcentre Mall

177, 100 Anderson Rd. SE  
(Lower level, south side, in the  
Professional Offices)  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
NO X-RAY

### Sunpark Prof. Centre

125, 40 Sunpark Plz. SE  
Bone Mineral Densitometry,  
Breast Imaging, Nuclear  
Medicine Imaging,  
Ultrasound, NO X-RAY

### Sunridge Plaza

150, 3363 – 26 Ave. NE  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
Vacular Lab, X-ray

### The CORE Shopping Centre

417, 751 – 3 St. SW  
(4<sup>th</sup> floor in The CORE Medical  
Centre, next to the food court)  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
X-ray

### Westbrook Prof. Building

200, 1610 – 37 St. SW  
Bone Mineral Densitometry,  
Breast Imaging, Ultrasound,  
X-ray

## COCHRANE CLINIC

### Cochrane Grande Plaza

1123, 116 Grande Blvd.  
Bone Mineral Densitometry,  
Breast Imaging, Pain  
Management, Ultrasound,  
NO X-RAY
